

Local stakeholder update May - June 2016

Outlined below is a summary of progress with regard to the works on site in May, and a look ahead to activity due to take place throughout June.

MAY

- Work began to install solar cells on the roof of the Recyclables Bulking Facility.
- Piling for the foundations for the Gasification Facility got underway. Residents nearest the site were notified in advance by letter.
- Work began to erect the steel frame of the Anaerobic Digestion Facility building.
- The Reuse Facility opened and is being used for containers of small recyclables whilst the service in the recycling centre is restricted.
- Wooden hoarding is being put up in the community recycling centre around the gasification facility working area.
- Work continued on:
 - Cladding the Anaerobic Digestion Facility tanks.
 - Testing the Anaerobic Digestion Facility tanks for any leakage by filling them with water.
 - The ground slabs for the Anaerobic Digestion Facility building.
 - The perimeter road to the north and east of the site.
 - The new exit road for the Community Recycling Centre.
 - Preparing the new Community Recycling Centre office.

JUNE

- Work will continue on:
 - Piling for the Gasification Facility.
 - Cladding the Anaerobic Digestion Facility tanks.
 - The steel frame of the Anaerobic Digestion Facility building.
 - The perimeter road to the north and east of the site.
- The new weighbridge office is due to be fitted out and the weighbridges commissioned.
- The new Community Recycling Centre office is due to be completed.
- The layout of the Community Recycling Centre will continue to be restricted; there are fewer parking spaces available and the site is accepting the full range of materials, with a reduced number of containers. As a result, waiting times are affected, particularly at busy times. Staff are working to minimise disruption and will be on hand to assist site users.
- Surrey County Council is currently reviewing opening hours at the Community Recycling Centre to help alleviate waiting times.
