

Eco Park development, Charlton Lane, piling works

15 August 2016

Dear Sir / Madam,

We are writing with an update on the second and final phase of piling works for the Eco Park development at our Charlton Lane site.

We are pleased to confirm that the piling finished ahead of schedule on 11 August. Piling is a necessary part of the construction process to provide stable foundations and this latest phase for the Eco Park's gasification facility began in late May.

Our contractors worked to complete the piling as quickly as possible to minimise disturbance to nearby residents, and we would like to apologise for any inconvenience resulting from the works and thank you for your patience during this time.

Looking ahead to the autumn, you will start to see the steel frame of the gasification facility building being put in place.

If you would like to stay in touch with progress with the development, you can sign up to our e-newsletter at ecoparksurrey.uk and if you have any queries or concerns about the building works, please contact me on 01932 766 905.

Yours faithfully,

A handwritten signature in black ink, appearing to read "Emma Jordan".
